

Hi,

I have currently a Glo-health insurance policy and I have had the policy for 4years.
My DOB is [REDACTED]

I have to temporarily leave the country to take up a work opportunity in the UK.
It is likely I will be out of the country for a period of time (anything from 3-10 years).
I am concerned that by taking this opportunity that I may be penalized on my return for not paying for an insurance plan in the interim by being additionally rated (my current insurance plan is off no benefit to me in the UK).

Can you please put this forward for consideration during the consultation process.
I think a fair solution would be if you had paid into a plan for a period of time before leaving the county i.e 2 years that when you return that you could start paying back into a plan without a rating.

Thanks,

Jonathan McGleenan.
